NNN99 Solar and Supernova Neutrino Working Group

1 Thursday, 23 September

1.1 Working Groups I (main auditorium)

4:05-4:15	Synopsis: Solar and Supernova Neutrino Group	R.Svoboda (LSU)

2 Friday, 24 September

2.1 Working Groups II (Rm 302)

10:55-11:05	SuperK	R.Svoboda (LSU)
11:05-11:15	SNO	J.Heise (SNO)
11:15-11:25	Borexino	L.Oberaver (Borexino)
11:25-11:35	KamLAND	L.DeBraeckeleer
11:35-11:45	Hellaz	T.Patzak (Tufts)
11:45-11:55	Heron	R.Lanou (Brown)
11:55-12:05	New Center for Underground Physics	J.Peltoniemi (Helsinki)
12:05-1:45	Lunch	

2.2 Working Groups III (Rm 302)

2.2.1 Supernova Session

1:45-1:55	OMNIS	R.Boyd (OSU)
1:55-2:05	Advanced SN detector	D.Cline (UCLA)
2:05-3:10	Supernova Session Discussion	A.Burrows (Arizona)
3:10-3:30	Break	

2.2.2 Solar Neutrino Presentations and Moderated Discussions

3:30-4:00	LENS/goals for new low threshold measurements	R.Raghavan (Lucent)
4:00-4:15	goals for new high statistics measurements	R.Svoboda (LSU)
4:15-4:30	a mixed light/heavy water detector	A.Rushdy
4:30-4:50	how important is location?	P.Krastev (Wisconsin)
4:50-5:20	how good are solar models?	J.Bahcall (IAS)
5:20-6:00	general discussion	

3 Saturday, 25 September

3.1 Working Group Reports I (main auditorium)

11:30-12:05	Solar and Supernova Neutrino Working Group	S.Pakvasa (Hawaii)/R.Svoboda (LSU)
